

# **Consult with Loved Ones on the Other Side**

## **Heart and Soul Connections with Pets in San Diego, CA**

Brigitte recognizes that the connection we develop with animals can often be stronger and deeper than with humans, even family members. Invariably, we develop a heart-to-heart and soul-to-soul connection with our beloved animals, and we have to say good-bye time and time again.

Through her heart and soul connections with pets in San Diego, CA, Brigitte's communication with your beloved animal on the other side can provide a great sense of comfort and healing.

By all accounts and Brigitte's personal experience, this is a positive, upbeat, and healing time for all. People often come to the consult with Brigitte with sad and teary eyes but leave comforted and with a smile.

## **Telepathic Animal Connections**

In their own way, animals also feel the pain of separation with their humans. It is a highly individual process, but Brigitte helps to create that connection one more time so that you can check on them, and help to bring relief and comfort. This is an opportunity to resolve unfinished business and get a sense of where they are in the multi-tiered process of concluding this incarnation.

After a period of mending and restoring the wholeness to the holographic fabric of their former bodies, some animals like to stay close to the earth plane and come to visit in spirit

form for a while. Others choose to hang around for a bit and then move on to more ethereal planes further out.

As a pet psychic, Brigitte assists you in properly recognizing a presence and connecting with the energy sent to you from your animal companion on the other side. It is a specific and distinctive experience with each and every relationship. No two consults are alike; they may be similar, but never exactly the same.

Brigitte found that it is favorable to wait around 15 days after a passing to have a good clear connection with a deceased animal friend. During that time, an animal friend has had time to adjust to the new environment. And their people can achieve a higher vibration to facilitate clear communication. (Sorrow and grief have lower frequencies.)

The animal communicator services are similar in format to **regular consultations**.

These sessions can be done in person or on the phone. Please provide good photos (JPG or paper copy).
