

Typical Session

Bruno, Tutti and Big. "We've had sessions!"

Animal Behavior Communications

Visit with Brigitte Noel for animal behavior communications in San Diego, CA, and understand what needs to take place to improve your relationship with your animal friend.

To begin the session, Brigitte will spend some time with you and about fifteen minutes with your pet in complete receptivity. In real-time she transcribes the silent conversation, and then reads and conveys, to the best of her ability, what your animal has communicated with her. A discussion follows. You'll have an opportunity to consider your pet's needs and wants, and Brigitte will offer suggestions about how you can address them. Her recommendations, based on the information shared by your animal friend, cover simple, practical steps you can take to improve your life together, as well as referrals to holistic veterinarians and animal health practitioners when necessary.

Brigitte also addresses non-toxic pest control for pets and convenient, preservative and by-product-free nutrition and home cooking. In addition, Brigitte offers her Elemental Wisdom custom blend flower essences to support and heal long-term emotional issues.

The average in-office session, therapeutic in nature, lasts an hour and a half. Fees will be discussed in advance and may depend upon the specific situation and number of animals. A single session is all that is needed in most cases. The consult is recorded in digital MP3 format and a link is sent to your email address. It is easy to download to your computer in iTunes or Media Player to playback the recording.
